How to set up email on iPhone

☁ iCloud

E🖧 Exchange

Google™

YAHOO!

Aol.

o✉ Outlook.com

Other

1) Go to [Settings] -> [Mail] -> [Accounts] -> [Add Account]. Then select [Other].

MAIL

Add Mail Account   ›

SERVERS

Add macOS Server Account   ›
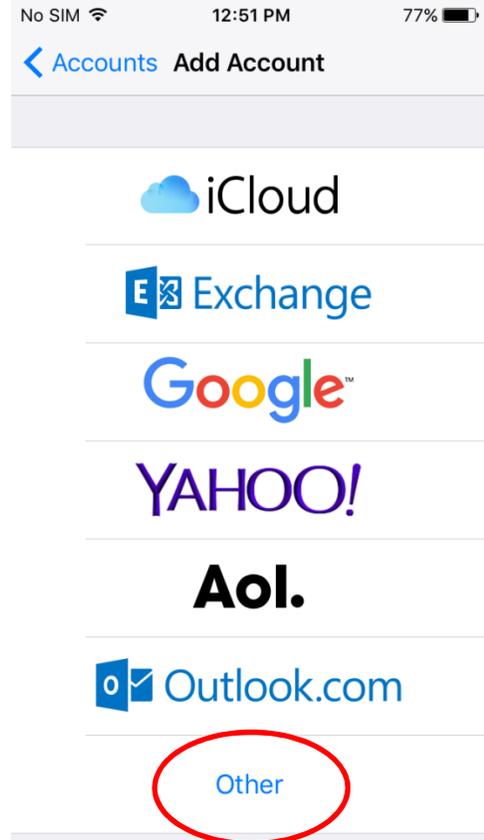

2) Select [Add Mail Account].
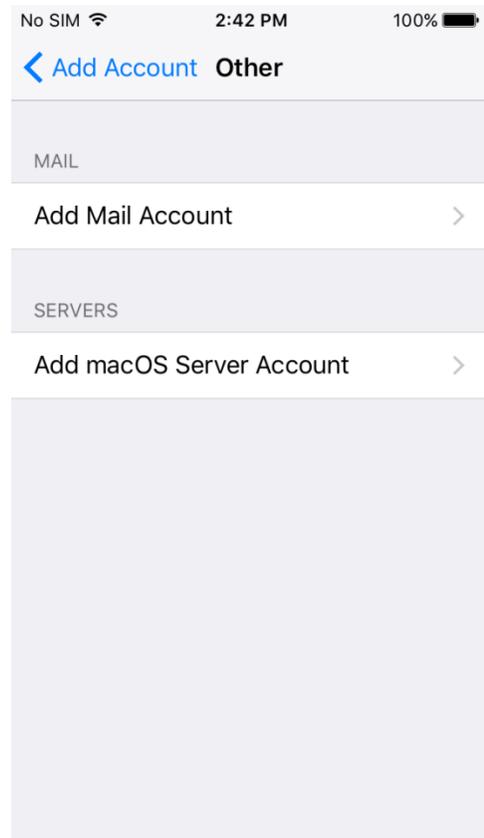

3) Enter your email details. Click [Next] when completed.
   For POP settings, go to step 4.
   For IMAP settings, go to step 6.

4) For POP settings, enter "mail.[domain name]" in the [Incoming Mail Server] host name.

The details that you have entered previously should retain in the username and password field. If empty, please re-enter the details.

In the [Outgoing Mail Server], enter the same details you entered in [Incoming Mail Server]. When done, click [Save]. The app will try to verify your settings.

6) For IMAP settings, enter "imap.[domain name]" in the [Incoming Mail Server] host name.

The details that you have entered previously should retain in the username and password field. If empty, please re-enter the details.

In the [Outgoing Mail Server], enter "smtp.[domain name]". When done, click [Save]. The app will try to verify your settings.

You might experience the same error as in step 5. Just verify the certificate, and you may proceed to use you email after that.
